

ZOLL AED Plus Automated External Defibrillator

ZOLL.

Only half of all cardiac arrest victims require defibrillation, but all will require high-quality CPR. The AED Plus is the first and only automated external defibrillator (AED) with Real CPR Help. This real-time feedback guides a rescuer to provide the best CPR possible. Zoll can help keep your facilities safe with the AED that helps you when it matters most.

The AED Plus provides:

- Real CPR Help - real-time feedback on the depth and rate of chest compressions during CPR.
- The Lowest Total Cost of Ownership - once installed, there is nothing to purchase for, or replace on, the AED Plus for five years.

FEATURES

- **Real CPR Help®** is real-time feedback for rate and depth of chest compressions during CPR. The AED Plus® is the ONLY AED that can SEE what you're doing during CPR. Verbal and audio prompts for PUSH HARDER and GOOD COMPRESSIONS and visible bar gauge on the display screen for each compression in real time. Real CPR Help is MORE than "CPR coaching." Other CPR coaches are BLIND, and cannot SEE your CPR.
- **It supports the AHA's Complete Chain of Survival**, starting with "CHECK RESPONSIVENESS" through performing CPR. Until electrodes are attached, the AED Plus prompts for all those things that should be done prior to the first heart analysis, including calling for help and performing the ABCs of the rescue.
- **Once installed, the AED Plus has the LOWEST Total Cost of Ownership.** There is nothing to replace or buy for five years because the CPR-D-padz® and batteries last FIVE years. In ten years you will replace pads and batteries only once for a total cost of \$244, an average annual cost of \$24.40. And the logistics are simple. Avoid the headache of tracking and replacing pads and batteries every other year.
- **Powered by 10 Lithium batteries with redundant battery circuitry.** The Lithium 123A batteries can be purchased at any retail camera store, and are the very same ones found in AEDs from Philips, Welch Allyn, and Defibtech. These batteries are arranged in two separate, redundant power circuits with five batteries in each circuit. Should one circuit ever fail, the AED Plus automatically "changes batteries" in a split second by calling on the other circuit to provide the needed power.
- **Best Ingress Protection rating for dust and water.** The AED Plus has an ingress protection (IP) rating of IP55 for dust and water, which is the highest IP rating of any AED in the market today. This enables placement in ideal locations, allowing quick access to an AED for emergencies that may occur outdoors, near water and moisture, or in dusty environments full of small airborne particles.

ORDERING

ZOLL AED Plus Automated External Defibrillator

ZOLL AED Plus with AED Cover, PlusRX Medical Prescription, CPR-D-padz® Electrode, pack of 10 CRI23a batteries, and Carry Case
