SKULLERZ® DAGR SAFETY GLASSES // SUNGLASSES

The Skullerz® Dagr Safety Glasses are half-frame glasses named for the Norse God of Sunrise. These protective work safety sunglasses feature tough scratch-resistant lenses filter 99.9 percent of harmful UVA, UVB and UVC rays to keep your eyes safe in the sun. The blade-style design is a sleek and sporty look, perfect both on the job or off.

The durable frames bend and flex without breaking. A non-slip rubber nose piece and rubber temples keep the glasses secure and resist sweat.

LENS TECHNOLOGIES

Available with a polarized lens or with anti-fogging solution for glasses.

The polarized safety glasses reduce glare and eye fatigue around water, snow and in other bright environments. Anti-glare safety glasses have long been favorites of boaters and people who enjoy fishing and sports on the water because they block the harsh reflected light from water, keeping eyes comfortable around glare.

Anti-fog safety glasses with Fog-Off™ treatment won't wash off or wear off for fog-free viewing no matter what you're doing. Great for use with dust masks, these lenses won't fog so you can focus on the job at hand.

TESTED & APPROVED

- **IMPACT RESISTANT** – Meets ANSI Z87.1+, CSA Z94.3 + & MIL-PRF 32432 Ballistic Impact
- **ANTI-SCRATCH + UV PROTECTION** – Scratch-resistant lens blocks 99.9% of harmful UV rays
- **DURABLE BLADE FRAME** – Durable nylon blade-style frame bends and flexes without breaking
- **NON-SLIP DESIGN** – Rubber nose piece and rubber temples keep the glasses secure and resist sweat
- **TEMPLE ACCESSORY SLOT** – For adding accessories while improving airflow
- **POLARIZED LENS AVAILABLE** – Select lens colors are available with polarized technologies to reduce glare and eye fatigue
- **ANTI-FOG AVAILABLE** – Select lens colors are available with permanent FOG-OFF™ treatment for clear vision at all times
- **PATENTED DESIGN**

52100	Matte Gray	Clear Lens
52103	Matte Gray	Anti-Fog Clear Lens

These impact-resistant safety glasses are tested to ANSI Z87.1+ High-Velocity Impact Protection and optical requirements. ANSI Z87.1 is the US standard for Personal Eye and Face Protection Devices and is listed on the frame.

These glasses are also tested to MIL-PRF-32432 Ballistic Fragmentation, Class 1, which is the US Military Combat Eye Protection System Performance Specification for eyewear. To pass the military standard, safety glasses must withstand a steel projectile shot at 660 ft / 201m per second which is 4x faster than the Z87+ standard. Lenses must not puncture, crack or shatter. Frames must retain the lenses and not break.

These good looking safety sunglasses are great for protecting your eyes during outdoor work like construction, carpentry/woodworking or landscaping. Also great for outdoor hobbies like boating, skiing, fishing, hunting/shooting, sports and more.

CHOOSING THE RIGHT LENS
